Thanks for drawing the problem of estimating recovery costs to my attention. I have reviewed the two methodologies and find that the one our construction engineers, [redacted] recommend is preferable.

25X1A9A

25X1A9A

The great merit of their method, in my view, is that it takes account of the largest costs which the Vietnamese would have to lay out to repair these facilities. Therefore, I suggest to use their methodology.

Sincerely yours,

25X1A9A
